

Electon - Theme Documentation

Thank you for purchasing theme from Codezeel.

1. Installation

The installation of a theme is a relatively straightforward process and here we will guide you through the steps of the process for theme installation.

Before you install this theme:

- 1: Read our complete instruction to install theme
- 2: Make sure you have installed and running the correct version of Prestashop: **Prestashop 1.7.x.x**
- 3: Take a FULL BACKUP for your site before you start theme installation if you have done any custom core modifications.

We recommend to use this theme on a new, clean installation or existing shops without custom core modifications.

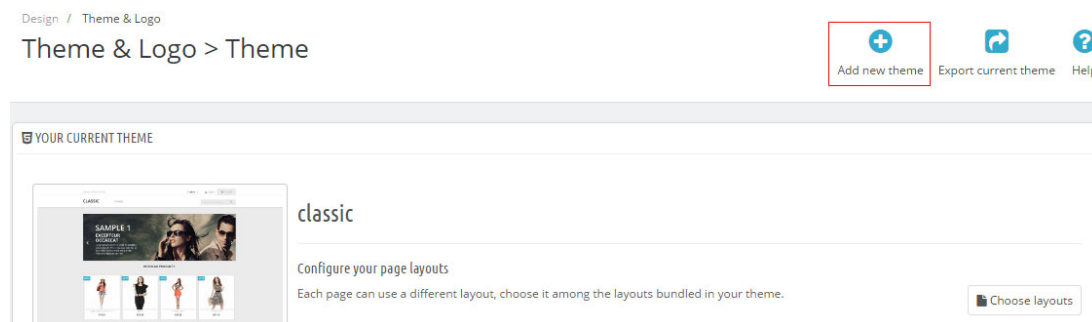

There are two options for theme installation. You can choose one of them.

- 1) Installation via the Admin Panel
- 2) Installation using FTP

1) Theme installation via the Admin Panel:

First of all login to your prestashop store admin panel and navigate to **Design > Theme & Logo**.

Here in this section top right corner you will see **"Add new theme"** button. Click here.

Here you will see **"Import from your computer"** you need to select Installer ZIP file which you have with theme downloaded package (**PRS140335_Installer.zip**) and click on **"Save"** button.

You have successfully installed your new theme!

NOTE:

After completion of above process upload all static images on your server in **"/public_html/img/cms/"** directory

using FTP or Cpanel Like Below Image.

You can find images in package folder: Prestashop Files_v.1.7.x.x/img/cms/ directory.

2) Theme Installation using FTP:

For install theme using FTP login to your server via cuteFTP or Filezilla with your server login detail.

Now unzip the downloaded theme package and you can see here folder with name "**Prestashop Files_v.1.7.x.x**" that containing three folders themes, modules and img.

Upload this three folders respective to your prestashop installation root directory as display in below image.

- folder "**themes**"
- folder "**modules**"
- folder "**img**"

After completion of above process go ahead for next step "Theme Activation Settings".

2. Theme Activation Settings

Once the theme is uploaded, navigate to **Design > Theme & Logo**.

In this section Select your theme **Electon** from "SELECT A THEME FOR THE "DEMO STORE" SHOP".

My theme for demo store shop

Electon Version 1.0.0
